# New England Governors & Eastern Canadian Premiers

34th Conference

#### COORDINATED RENEWABLE PROCUREMENT

Report By:
New England States Committee on Electricity

July 12, 2010 Lenox, Massachusetts

# **OVERVIEW**

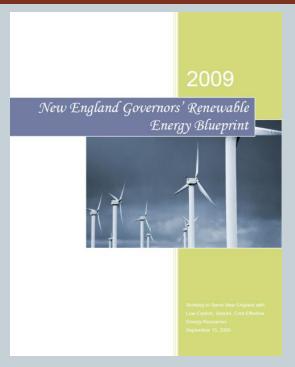

- > Brief Review: Governors' Blueprint
- Region-Wide Procurement Assessment
- Coordination Challenges, Possible Solutions
  - Potential Process Approaches
  - Possible RFP Elements

## Review: Governors' Renewable Energy Blueprint

### **Policy**

#### **Technical Analysis**

Governors' Renewable Energy Blueprint

ISO-NE Renewable Development Scenario Analysis

# The Blueprint's Road

September 2008 February 2009

March 2009

Walch 2003

**July 2009** 

September 2009

**Today** 

**Tomorrow** *figuratively* 

Governors' Resolution

Governors write to President Obama, Congress

States request ISO-NE technical analysis

ISO-NE issues RDSA

**Governors Adopt Blueprint** 

Consider coordinated procurement issues

Discuss procurement with stakeholders, Canadians

#### **Blueprint Technical Conclusions: Ample Resources, Choices**

# The New England Region has ...

 vast quantity of untapped renewable resources: more than 10,000 MW on & off-shore wind power potential

# If developed conservatively...

 there are ample renewable resources to enable New England to meet renewable energy goals

# If developed aggressively...

 New England could export renewable power to neighboring regions

#### **Blueprint Policy Conclusions: Facilitation Opportunities**

#### New England has...

Cooperative experience, inclination to do more

Siting processes that could accommodate some degree of coordination

Long-term contract approval mechanisms

# Common Contract Themes:

**Competitive Processes** 

&

Interest In Securing Low Cost, Costeffective, Or Cost Stabilizing Power

#### **New England Governors' Blueprint Resolution**

Governor
John Baldacci
Maine

Governor Deval Patrick Massachusetts Governor M. Jodi Rell Connecticut

Governor John Lynch New Hampshire

Governor

Donald L. Carcieri

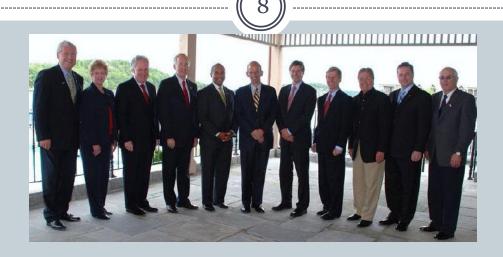

Rhode Island

Governor Jim Douglas Vermont

**BE IT FURTHER RESOLVED** that the New England Governors authorize their regulatory and policy officials to use the Blueprint as a resource to help support development of New England's renewable resources in their public advocacy, rule-making, policy development and other initiatives; and

**BE IT FURTHER RESOLVED** that the New England Governors authorize their regulatory and policy officials to review the availability of renewable resources in the region, including those identified in the Blueprint, and to consider potential mechanisms for the joint or coordinated but separate competitive procurement of renewable resources, and to report the results of such a review to the Governors within the next twelve months.

# Governors' & Eastern Canadian Premiers' Renewable Energy Resolution

**BE IT FURTHER RESOLVED THAT** the New England Governors and Eastern Canadian Premiers wish to provide clarity to renewable energy producers and through the NICE, will initiate a meaningful dialogue between the states and provinces on the types of contract structures, pricing mechanisms and regulatory approvals that may offer the best opportunities for success in the New England and Eastern Canadian electricity marketplaces; and

**BE IT FURTHER RESOLVED THAT** this dialogue will consider potential terms and conditions for the procurement of regional power and a sample regional *Request for Proposal* for the procurement of renewable power (including energy, capacity, reserves, etc.) that could serve as a model for future solicitations.

### Renewable Procurement Work Group

Representatives from each New England state experienced in procuring power or overseeing power procurement by load serving entities

**NESCOE** Managers

Other State Officials

- Assessed power procurement practices, processes
- Looked at coordination opportunities, impediments & solutions
- Considered pricing structure alternatives, model terms & conditions
- Identified potential contract approval process options

#### **Comprehensive Procurement Assessment**

# **Bottom Line: It's Complicated**

- on different timeframes
- for different services, contract term lengths, percentages of load
- through different entities

Assessment will inform coordination mechanism discussions with stakeholders, Canadians

## New England's (Illustrative) Procurement

#### What's Renewable?

12

Six States. Six Definitions.

## **Commonality Provides Opportunity**

All 6 states recognize wind, small hydro, solar, landfill gas & biomass All 5 states with an RPS also recognize ocean power

		STATE						
		CT	MA	ME	NH	RI	VT	
	Small Hydro	x	X	x	х	×	x	
	Large Hydro						x	
	Wind	×	x	x	x	×	х	
RESOURCE TYPE	Solar	x	x	x	x	×	x	
	Waste	x		x (w/recycling op)			х	
	BioMass	x	x <sup>1</sup>	x	x	x	x	
	Landfill Gas	x	X	x	x	×	x	
	Demand	x (class 3)					x	
	Ocean	×	x	x	x	×		
	Efficiency	x (class 3)					x	

<sup>&</sup>lt;sup>1</sup> Massachusetts recently completed a biomass study. Massachusetts will conduct stakeholder process in which it will consider the study results and current regulations.

# Primary Coordination Challenge

13

Need to Bring Together Multiple Entities Across New England That Issue RFPs, Evaluate Bids & Negotiate With Bidders

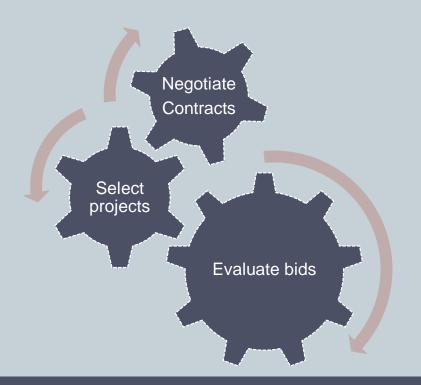

#### **Potential Solution: Form a Team**

#### **New England Renewable Procurement Team**

Include EDCs & state entities, like Maine PUC, others that administer RFPs, select projects, negotiate with bidders

#### Purpose:

To work collaboratively during RFP administration & early bid evaluation

#### **Prerequisite**:

Cooperation of EDCs, others

# **State Input to Procurement Team**

WHY? Renewable procurement to advance state objectives; state perspective early in solicitation & bid evaluation process constructive

HOW? STATE COORDINATING LIAISON COUNCIL

WHO? State entities separate from those that review & approve contracts; State discretion as to whether & who participates

WHAT? Limited consultative role to the Procurement Team through development of a short list of bidders; submit to PUC opinion on RFP process & merits of proposed contracts

# **Coordination Process Opportunities**

Issue RFPs, based on model, simultaneously

Establish Common RFP Schedule

Administer RFP cooperatively (bidder questions, etc.)

Finally, Bid Evaluation: Procurement Team Members could compare initial evaluations; individual Team Members ultimately independently select bid for final contract negotiation, finalization, presentation to respective PUC

# Other Primary Coordination Challenge

Need to Address That Each Procurement Entity Uses
Distinct Solicitation Instruments

& Evaluation Processes

Some Driven by State Law

#### **Potential Solution: Model RFP**

**Model RFP** requesting consistent bid information, under materially similar terms & conditions, would provide uniform information to enable coordinated evaluation. States could...

Adopt Model RFP in Material Respects

Set Common Date by Which to Modify RFP to Comply with State Law

Adopt Modified, State RFP based on Model

### **Some Potential Model RFP Elements**

Ratepayer impact comparison

Competitive, All-in Delivered Price

Commercial Operation Date

Established to encourage new resources

Operational responsibility, risk on project owner

Financial, not physical arrangement

Explanation of benefits to the region

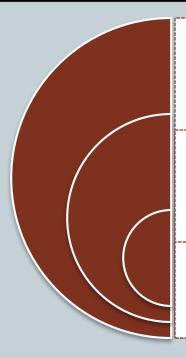

Diversity?
Price Stability?
Displace carbon units?

#### **Potential Model RFP Terms & Conditions**

#### **FLEXIBILITY**

To maximize opportunity to assess broadest range of proposals that may be in ratepayers' interest

# Resource location & type

- New England, Canada?
- Renewable somewhere?
- As long as able to be valued in New England market

#### **Pricing**

- Fixed?
- Indexed?
- Multiple pricing proposals per project?

**Contract Length** 

- 10 Years?
- 15 Years
- 20 Years?

#### **Common Question:**

What About In-State Development?

# Coordinated procurement needn't interfere with ...

- state programs that encourage renewable development or advance certain energy & environmental objectives
- state discretion to decide whether proposed long-term contracts meet their energy & environmental objectives

#### Coordinated Procurement: One Possible Option Others May Prove Viable & Cost Effective

Since adoption of the Governors' Blueprint, other activity in the region evidences broad interest in facilitating developing renewable resources in and around New England...

Evaluation of coordinated procurement does not preclude consideration of other approaches that may be prove to be cost-effective options for consumers.

#### **NEXT STEPS**

- ➤ Incorporate Governors' Feedback
- Discuss this preliminary procurement perspective with stakeholders, including Load Serving Entities, Renewable Developers, others as appropriate
  - ➤ Discussions with Canadians through the Northeast International Committee on Energy

Continue to Assess Other Renewable Resource Development Activity In & Around New England
